

## Answers In Creation Dinosaur Curriculum

### Test 11

1. Pterosaur newborns are called flaplings.
  - a. True
  - b. False
2. Pterosaur adaptations for flight included hollow bones, enlarged brain, and wings completely covered in feathers.
  - a. True
  - b. False
3. This group of marine lizards lived from about 85 million years ago until the end of the Cretaceous. The largest species was 57 feet long.  

---
4. These marine lizards (name means 'fish lizard') were long lived, from 245 million years ago until 90 million years ago. They resembled fish or dolphins, reaching over 13 feet in length.  

---
5. This group of carnivorous aquatic marine reptiles lived from 210 to 65 Ma, and reached lengths of 65 feet.  

---
6. The largest pterosaur, with a wingspan of 40 feet, was
  - a. Pteranodon
  - b. Pterodactylus
  - c. Hatzegopteryx
  - d. Pterodaustro
7. Plesiosaurs had four pairs of flippers to help them swim and change direction rapidly.
  - a. True
  - b. False
8. Plesiosaurs could not lift their head and long neck above water in a swan-like pose.
  - a. True
  - b. False
9. According to the teeth records of Ichthyosaurs, they were warm-blooded.
  - a. True
  - b. False

### Test 11 Lessons

Lesson 71 – Pterosaurs

Lesson 72 – Plesiosaurs

Lesson 73 – Ichthyosaurs

Lesson 74 – Mosasaurs

Lesson 75 – Colorful History

Lesson 76 – Creation Science

10. This marine reptile had a double-hinged jaw and flexible skull, allowing them to gulp down their prey almost whole, like a snake.
- a. Plesiosaur
  - b. Mosasaur
  - c. Ichthyosaur

Name the two scientists who were involved in The Bone Wars

11. \_\_\_\_\_

12. \_\_\_\_\_

Match the paleontologist with their main work.

- |                 |                           |
|-----------------|---------------------------|
| 13. John Ostrom | A. Warm-Blooded Dinosaurs |
| 14. Bob Bakker  | B. Maiasaura              |
| 15. Jack Horner | C. Deinonychus            |
